Subject: Microsoft Settlement

Ladies/gentlemen:

Reject the arguments of the neo-Fascists who are still attempting to crucify Microsoft -- for doing what Capitalists are supposed to do: Use creativity to make our lives better.

No one has ever forced anyone else to use Internet Explorer, or any other Microsoft product. All of Microsoft's "competitors" have been free to develop better, more attractive products; none of the "competitors" should be allowed to use DoJ or U.S. Taxpayers' money to attack Microsoft.

Tell each who wishes to use the U.S. Government as a club to "get a life."

Thanks/regards,
